Education

SRM Institute of Science and Technology

2023 – 2027

Bachelor of Technology (B.Tech.) in Computer Science Engineering

- Cumulative GPA: 8.65/10.0

Experience

C, C++ with DSA Internship

Jan 2025 – Mar 2025

Intern, Guntur, Andhra Pradesh

- Worked extensively with C and C++ focusing on Data Structures and Algorithms.
- Gained experience in Dynamic Programming, Graph Theory, and Object-Oriented Programming (OOP).
- Applied algorithmic problem-solving techniques to optimize program efficiency.

North Chiang Mai University

May 2025 – Jun 2025

Research Intern

- Developed a machine learning system to predict diabetes risk from patient health parameters.
- Built a ReactJS-based interface for user data input and prediction result visualization.
- Performed data preprocessing, feature selection, and model evaluation to improve model accuracy.
- Utilized Python and Scikit-learn for model training and performance analysis.

Projects

PowerMonitor – Android Battery Monitoring App

Java, Android SDK, SQLite

- Developed an Android application to monitor real-time battery usage and app activity.
- Implemented background services for continuous monitoring.
- Created visual analytics to identify high power-consuming applications.

Credit Card Fraud Detection

Python, Scikit-learn, Random Forest, SVM

- Built a machine learning model to detect fraudulent credit card transactions using a balanced dataset.
- Implemented Random Forest and Support Vector Machine (SVM) algorithms for classification.
- Achieved 100% recall using Random Forest, minimizing false negatives in fraud detection.

Maze Solver

Python, Data Structures, DFS, BFS

- Developed a maze-solving application using graph traversal algorithms such as DFS and BFS.
- Implemented pathfinding logic to compute shortest and valid paths from source to destination.
- Utilized stacks and queues for efficient maze exploration and navigation.

Skills

Programming Languages: C, C++, Python, Java, JavaScript

Technologies / Tools: Streamlit, Scikit-learn, ReactJS, MySQL, Git, Flask, TextBlob

Core Concepts: Data Structures and Algorithms, Object-Oriented Programming (OOP), Machine Learning, Natural Language Processing (NLP), Operating Systems
